Highly experienced in
multicultural environments
Seasoned world traveller

*Passionate, self-starting **front end developer** with several years of experience eager to contribute skills to a large organization which encourages problem solving, technical growth and the application of cutting edge technologies.*

Work Experience

Senior Web Developer

March 2016 – Present, Blue Beetle, JLT, Dubai

Full service agency which builds custom interactive applications and web solutions for clients around Dubai and the GCC region. Responsibilities include technology direction and strategy, full stack development and client relationship management.

- Implemented company-wide release management system
- Created bi-weekly educational seminar program
- Led front end development for major clients such as Atlantis, The Palm and Vision Magazine

Front End Engineer

August 2014 – February 2016, Qordoba, Dubai Internet City, Dubai

Primary duty was to build a modern language localization platform with an AngularJS based front-end. Qordoba required an extensive knowledge of JavaScript, HTML & CSS (SASS), RESTful web services, WebSockets and Git. Interaction with the rest of the development stack was also frequently required.

- Built Javascript SDK to localise content on the client side
- Hosted and organized company wide hackathons

Multimedia Developer

January 2014 – August 2014, Red Nucleus, Hamilton, NJ

Junior Web Developer

October 2012 – December 2013, Agency M, Philadelphia, PA

Notable Project Experience

Vue.js Universal Web App – *redro*

Platform allowing restaurants to build custom themed interactive food menus. Written entirely with Vue, Node and Webpack for both client and server side rendering connecting to a headless REST based content management system.

SaaS Angular Application – *app.qordoba.com*

Angular based application developed in team of two as a platform to localize content from websites, mobile applications and documents. Application contains interactive content editors, 'live' editors, reports, account administration, Google account integration and much more.
